Forecast For The United Kingdom
Issued by Met Office Exeter
at 0400 on Monday 08 Nov 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Turning cloudier today, some rain in the north and west.

Today:
Cloudy for many areas, cloud thick enough for spells of rain and drizzle in the north and west, especially western Scotland. Some brighter weather at times in the east, mainly this morning, and eastern and southern England staying dry.

Tonight:
Rather cloudy but milder than recent nights. Some rain at times in the north and west, especially over Scotland. Mostly dry elsewhere. Windy in the north and west.

Tuesday:
Early rain over Scotland and Northern Ireland clearing leaving sunny spells and showers. England and Wales rather cloudy with some rain developing in the north and west.

Outlook for Wednesday to Friday:
Band of rain in the south with showers and strong wind in the north Wednesday. Overnight mist and fog. Further rain into the northwest Friday. Temperatures near or above normal.
